

7271CRP

Eye/Face Washes

FEATURES & BENEFITS

Strainers/Filters

Chrome-plated brass in-line 50 x 50 mesh water strainer prevents debris from reaching the eyewash so the unit stays functioning at its best. Strainer is easily serviceable.

Quality Control

Eye/face wash and valve assembly is pre-built and fully water/pressure tested to ensure no leaks and proper function which ultimately reduces installation time.

Valve

Valve is designed to make the flushing of fluid occur with the push of a stainless steel flag, and is equipped with a stainless steel ball and stem to provide added protection against corrosion and breakage.

Antimicrobially Treated

AXION MSR™ eye/face head is antimicrobially treated using the natural protection of silver. Impregnating these components with silver helps protect the head against the growth of mold and mildew on the treated components. AXION MSR™ is the only eye/face product on the market to feature antimicrobial protection.

Bowl

The 11" round green ABS plastic receptor is resistant to damage from alkalis, salt solutions, oils and most acids.

Eye/Face Wash

AXION MSR™ eye/face wash head (patent pending) uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity.

Construction

1-1/4" Schedule 40 hot-dipped galvanized steel pipe and fittings along with a powder-coated cast-iron 9" diameter floor flange all coated with green epoxy paint to improve the supplied protection and provide an increased toughness in a long lasting corrosion resistant product.

SPECIFICATIONS

Model 7271CRP pedestal eye/face wash shall include a green ABS plastic 11" bowl, an antimicrobially treated AXION MSR™ eye/face wash head to help protect against the growth of mold and mildew on the treated components, and shall feature inverted directional laminar flow which achieves zero vertical velocity supplied by an integral 3.7 gpm flow control, chrome-plated brass stay-open ball valve equipped with stainless steel ball and stem, and chrome-plated brass in-line 50 x 50 mesh water strainer. Unit shall also include 1-1/4" Schedule 40 hot-dipped galvanized steel pipe and fittings along with powder-coated cast-iron 9" diameter floor flange all with green corrosion resistant epoxy coating, yellow plastic pop-off dust cover for eyewash head, universal sign, 1/2" IPS inlet, and 1-1/4" IPS waste.

OPTIONS

- Repair Kit: Model VRKEWSTR is a repair kit for SP507 and SP509. Includes screen and gasket.
- Hose & Spray Unit: Model 8901RFK, body spray unit with Feather-Flo ABS plastic head, stay open squeeze lever valve, 8 foot hose, and installation kit.
- Tempered Water Blending Systems: Model TWBS.EW, prepackaged, fully engineered and tested hot and cold water blending system with fail-safe features to produce up to 5 gpm tempered water for eye/face washes (Pat.# 5,350,112).
- Tempered Water Blending Systems: Model TWBS.EW.H, prepackaged instantaneous electrical water heater, 480 VAC/3 phase/18 KW, fully engineered and tested system with fail-safe features to produce up to 2.5 gpm tempered water for eye washes.

APPLICATIONS

Where the eyes or face of any person may be exposed to injurious or corrosive materials, suitable facilities for quick flushing and cleansing of the eyes and face must be provided within the work area for immediate emergency use. Emergency eyewash facilities shall be in unobstructed and accessible locations that require no more than 10 seconds for the injured person to reach.

Model 7271CRP is certified by CSA & IAPMO to meet the ANSI Z358.1-2004 Standard for Emergency Eyewash and Shower Equipment.
