Eye Medic™ Cartridge Eyewash

The Eye Medic Emergency Eyewash System is the safest and easiest solution for OSHA compliance needs. The purified flushing fluid eliminates the risk of further contamination of the user's eyes from dirty or stale water. The spray nozzles deliver a soft full stream in excess of the ANSI Z358.1 minimum recommended flows. The compact space saving design offers unlimited installation options. The two-year life of the fluid cartridges, and their easy replacement, reduces maintenance costs.

SE-4700

Eyewash station is 100% gravity-fed and features a high visibility yellow swing down activator and compact design for wall mounting or counter mounting with optional stand.
